## 3 Key facts for thinking about virtual water trade

Gains from trade

Land ‘grabs’

Farm trade

## The case of Spain

Time, space and economic dimensions

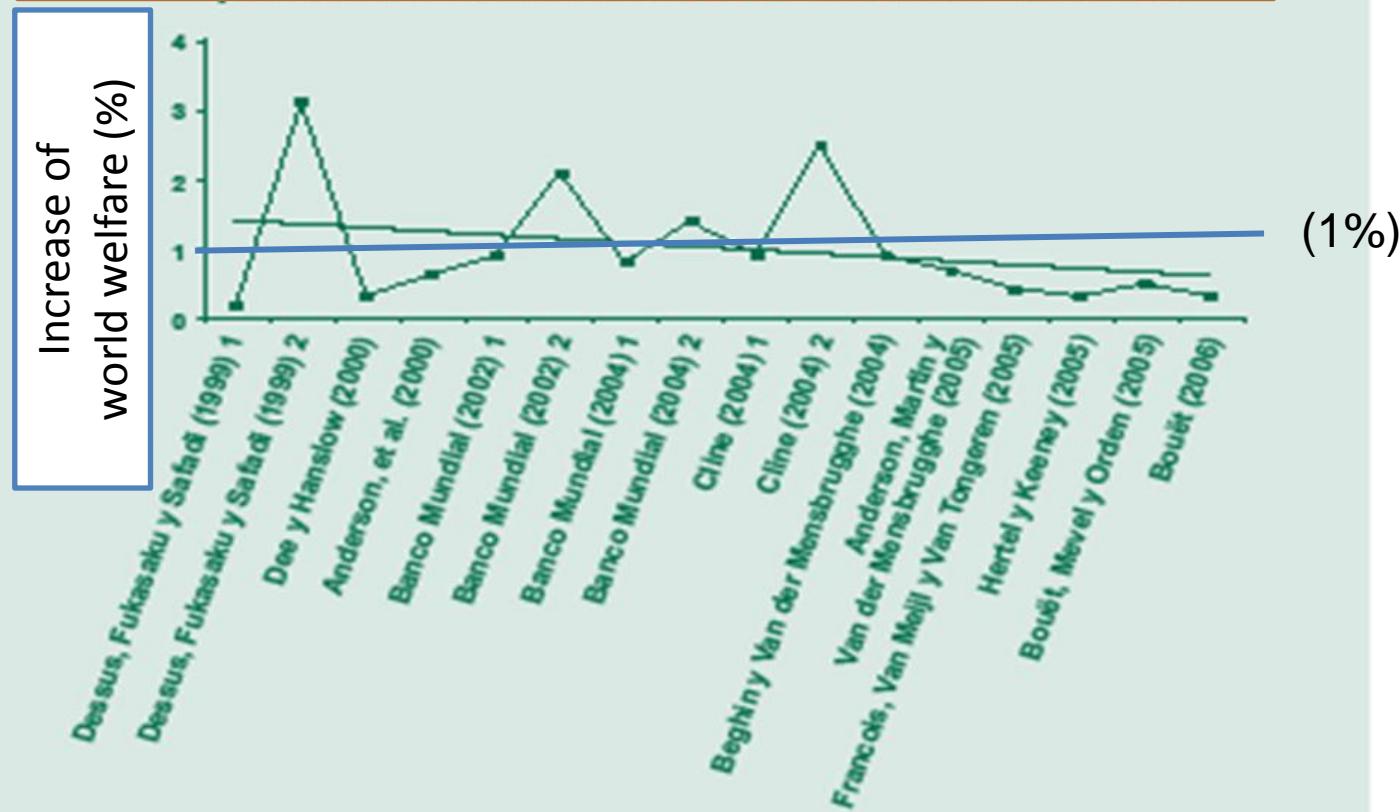

Does virtual water trade exacerbate water scarcity?

Agricultural policy conclusions

## Conclusions

# 1st Key fact: games from trade

Evaluation of the impact of full trade liberalisation

Source: Doët (IFPRI, 2009)

# 1st Key fact for thinking

The bulk of farm trade is performed by 14 countries+EU

## Leading exporters and importers of agricultural products, 2006

Taken from WTO (2009)

(Billion dollars and percentage)

	Value	Share in world exports/imports					Annual percentage change			
		2006	1980	1990	2000	2006	2000-06	2004	2005	2006
<b>Exporters</b>										
European Union (25)	405.25	-	-	41.5	42.9	10	14	7	9	
extra-EU (25) exports	95.31	-	-	10.1	10.1	9	11	8	13

# 3 Key facts for thought

- 1. ‘Land-grabs’ (Sources: The Economist / Ifpri)
  - Sudan has ‘reserved’ 20% of its farmland to Arab countries
  - China has purchased/leased 2.8 mill ha and set up 11 experimentation centres in Africa.
  - 15-20 mill ha (evaluated at \$ 20-30 bill) already leased.
  - Representing 30-40 mill. T of cereals (where 220 mill are trade each year worldwide).
  - Peter Brabeck-Letmathe, Nesté, CEO: “The purchases weren’t about land, but water” “The great water grab”

# 3 Key facts for thought

- 1. ‘Land-grabs’ (Sources: The Economist / Ifpri)

	Renewable resources (km3)	Withdrawal (km3)	Per cap withadrwl m3/p/yr	Arable Land (1000 ha)	Irrigated landgation potential (1000 ha)	A	B	B/A
Africa								
Angola	184	6.07	22	3000	60	3700		61.7
Cameroon	285	0.99	61	5960		290		
Ethiopia	110	5.56	72	10000	300	2700		9.0
Madagascar	337	14.96	804	2900	899	1500	1.7	
Mali	100	6.55	484	4634	232	566	2.4	
Mozambique	216	0.63	32	3900	117	3070		26.2
Niger	33.7	2.18	156	14483	145	270		1.9
Nigeria	286.2	8.01	61	28200	282	2330		8.3
Sudan	154	37.32	1030	16233	1786	2700	1.5

# 3 Key facts for thought

Taken from FAO (2009)

## In short...

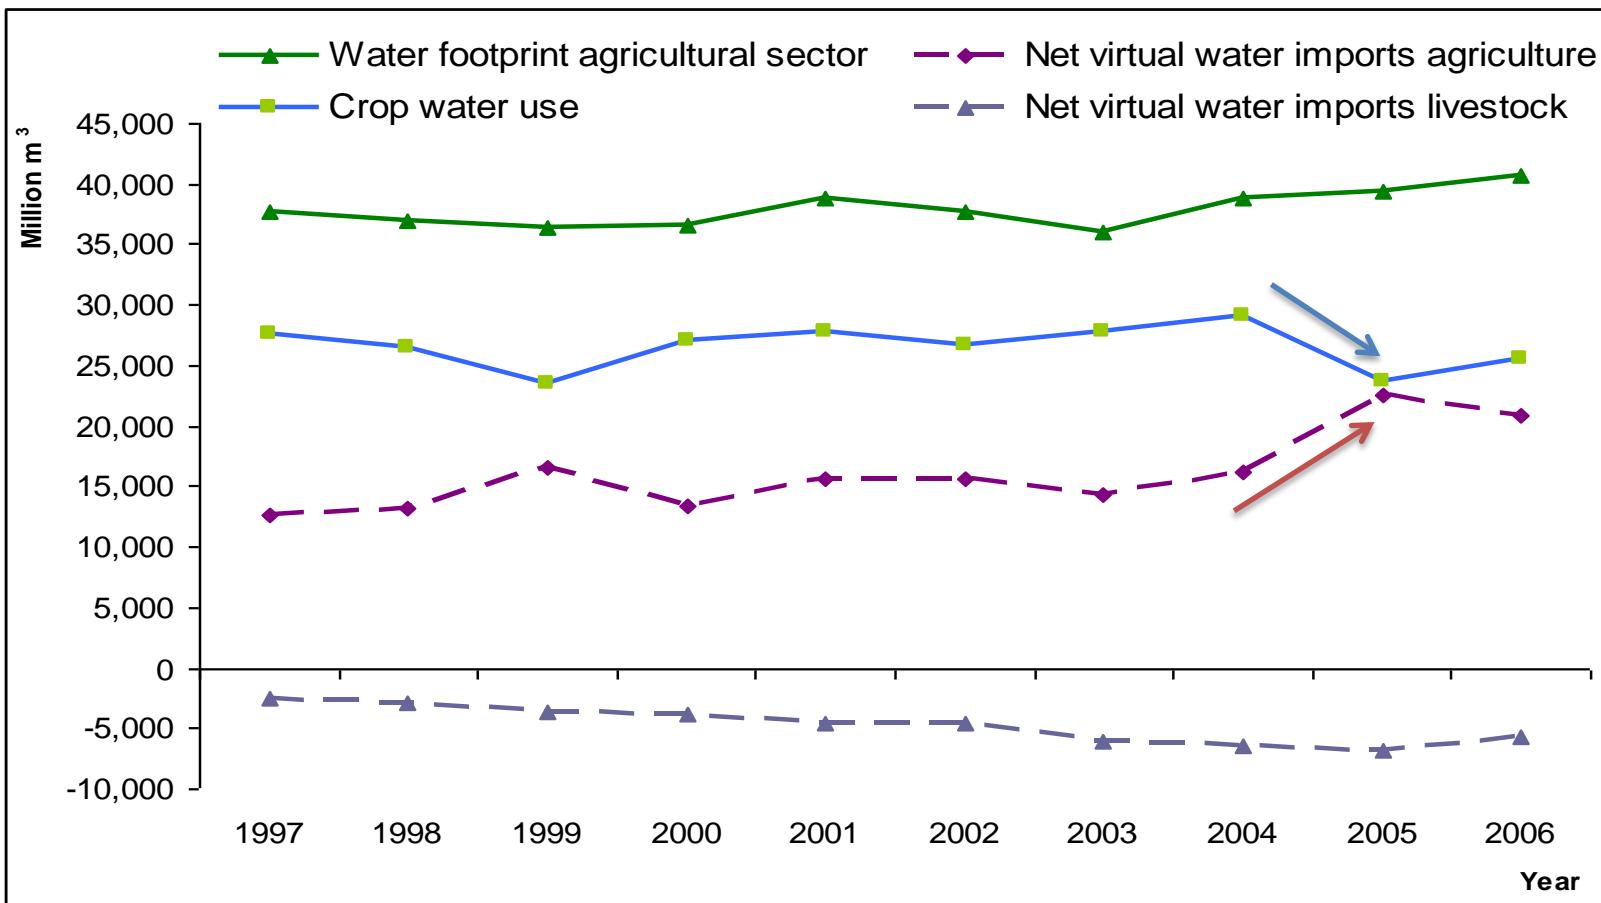

1. Africa has great potential, but needs capital, expertise and know-how. Africa can become a large food (energy) exporter.
2. Land-grabs are testimony of the huge gains-from-trade that can be achieved (it raises acute equity issues)
3. Many world agricultural regions are producing much below their productive potential (low input, little capital, lack of access markets)

# The case of Spain

1. Virtual imports and exports
2. Time-dimension
3. Space dimension
4. Economic dimension
5. Does virtual water trade exacerbate water scarcity?

# The case of Spain

## Agricultural Water footprint

Source: Garrido et al. (2009)

# The case of Spain

## Virtual water imports

Country	(10 <sup>9</sup> m <sup>3</sup> /Year)
Japan	94
Mexico	65
Italy	59
China	56
Algeria	45
Russian Fed	41
Iran	37
Germany	34
Korea	34
UK	33
Morocco	27

...

(Source: Garrido et al. 2009)

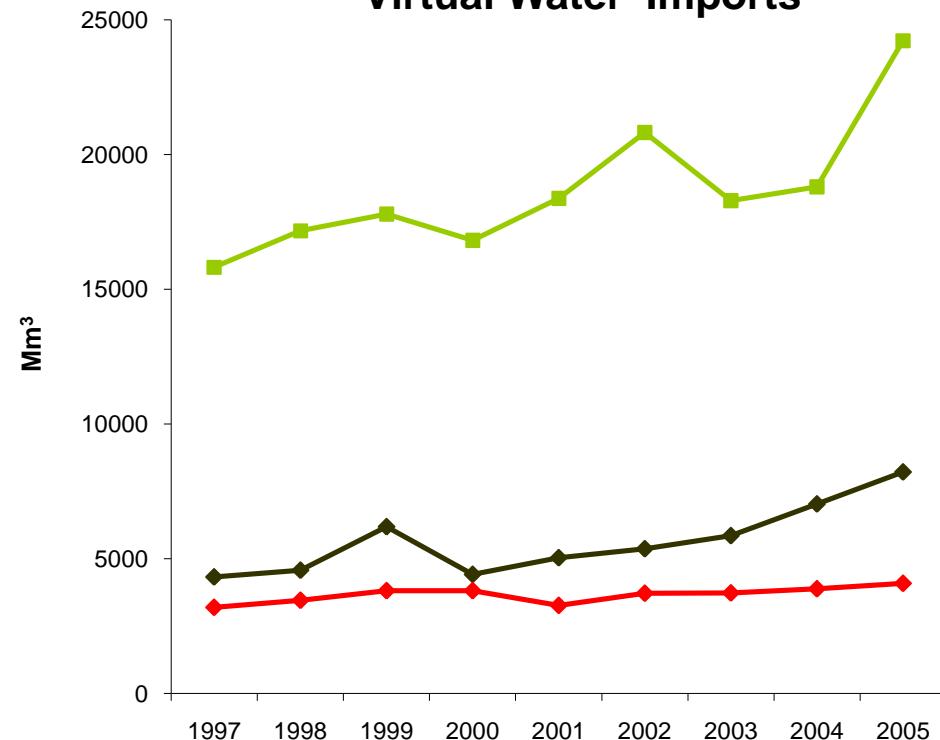

# The case of Spain

## Crop and livestock connections

**Virtual Water 'Exports'**

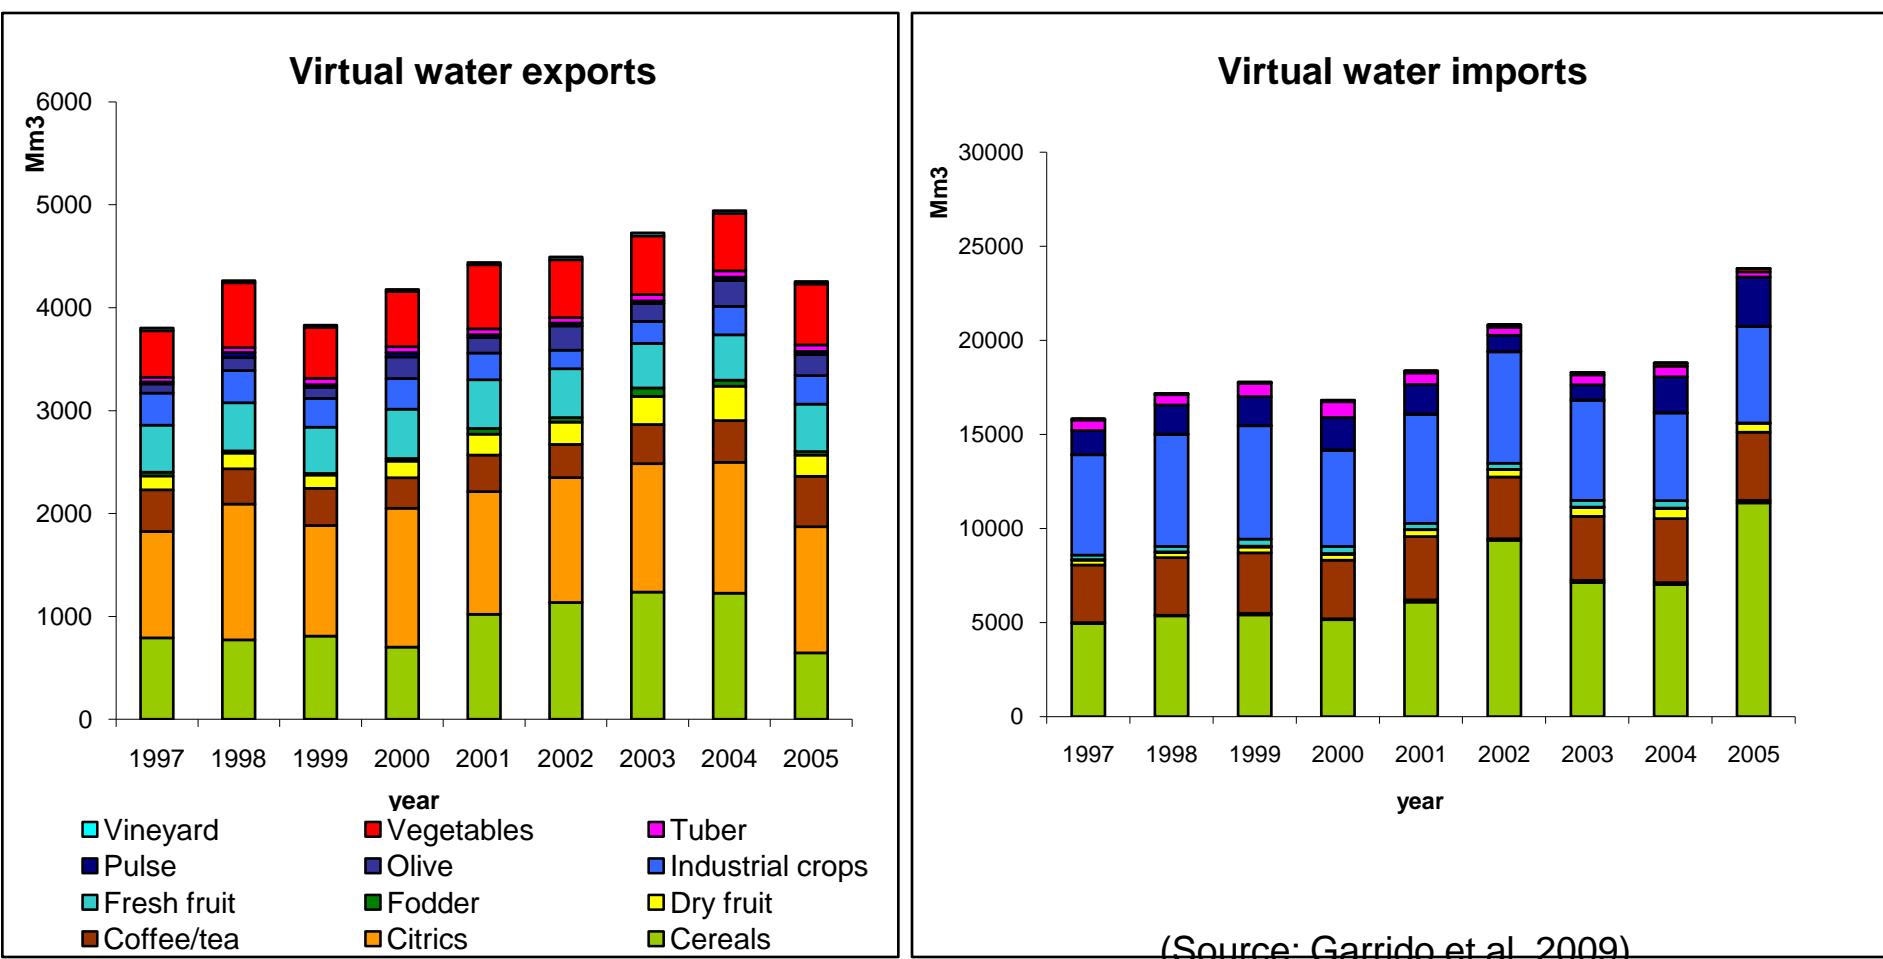

**Virtual Water 'Imports'**

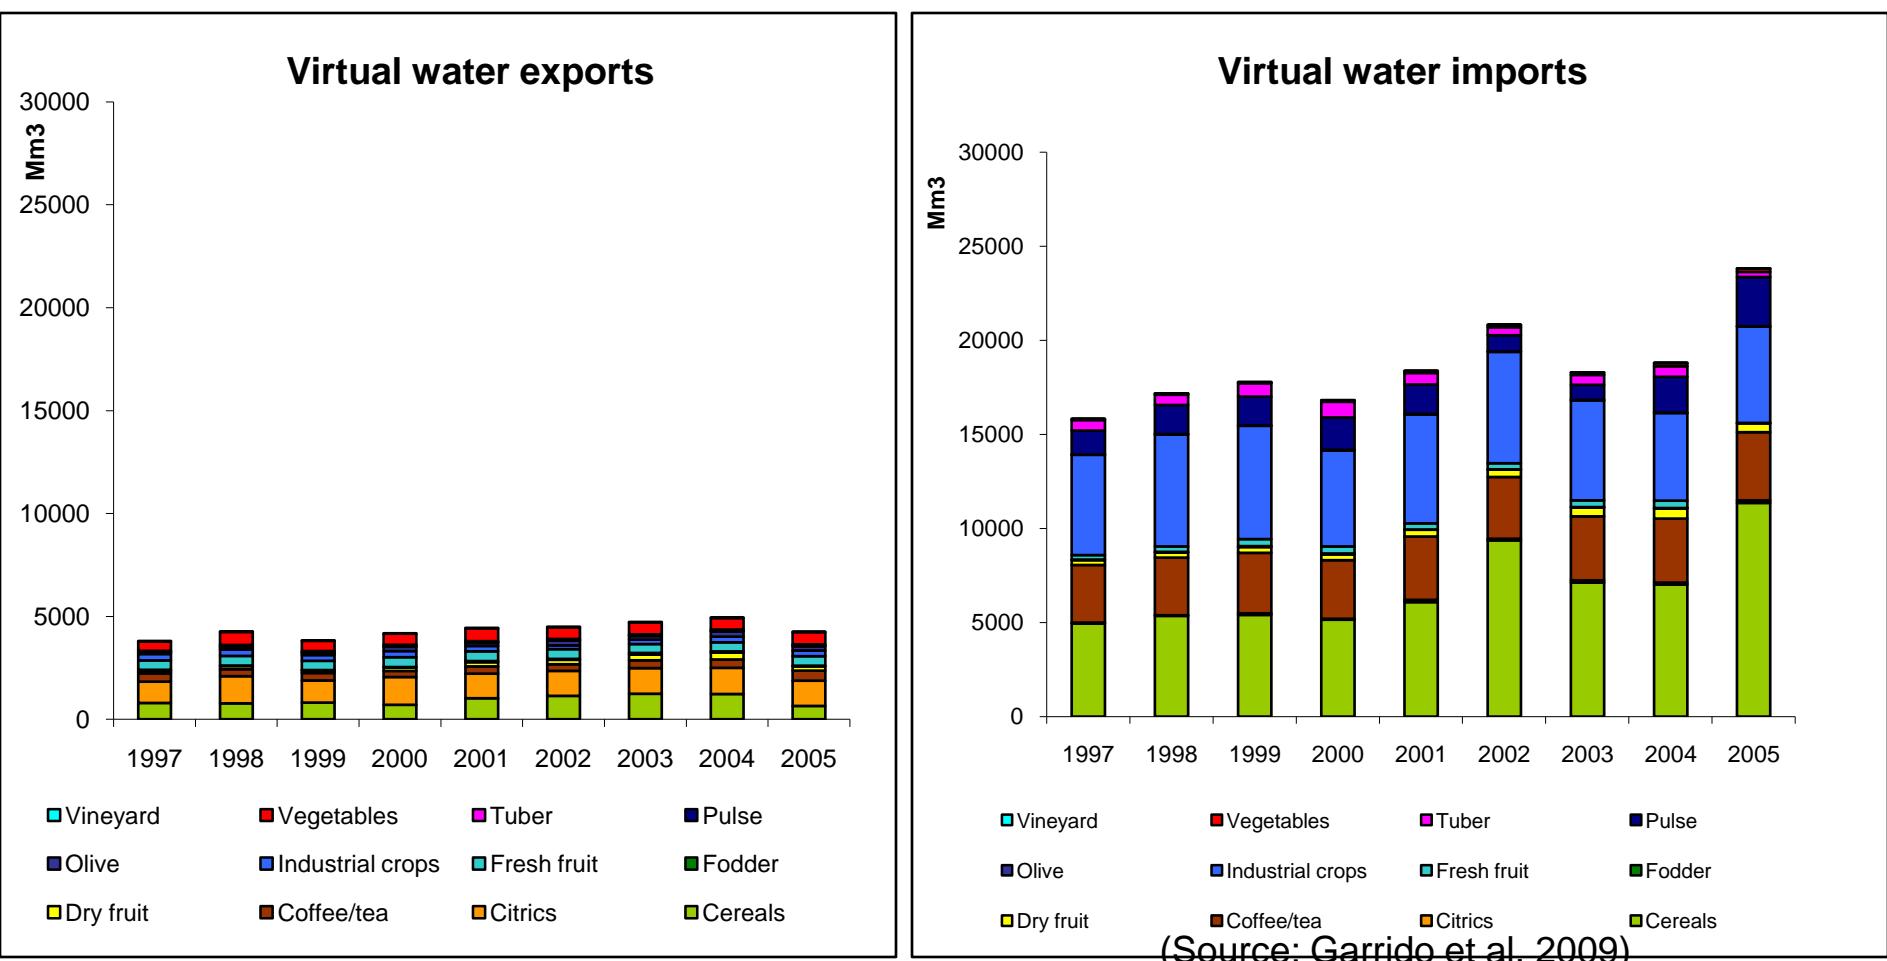

(Source: Garrido et al. 2009)

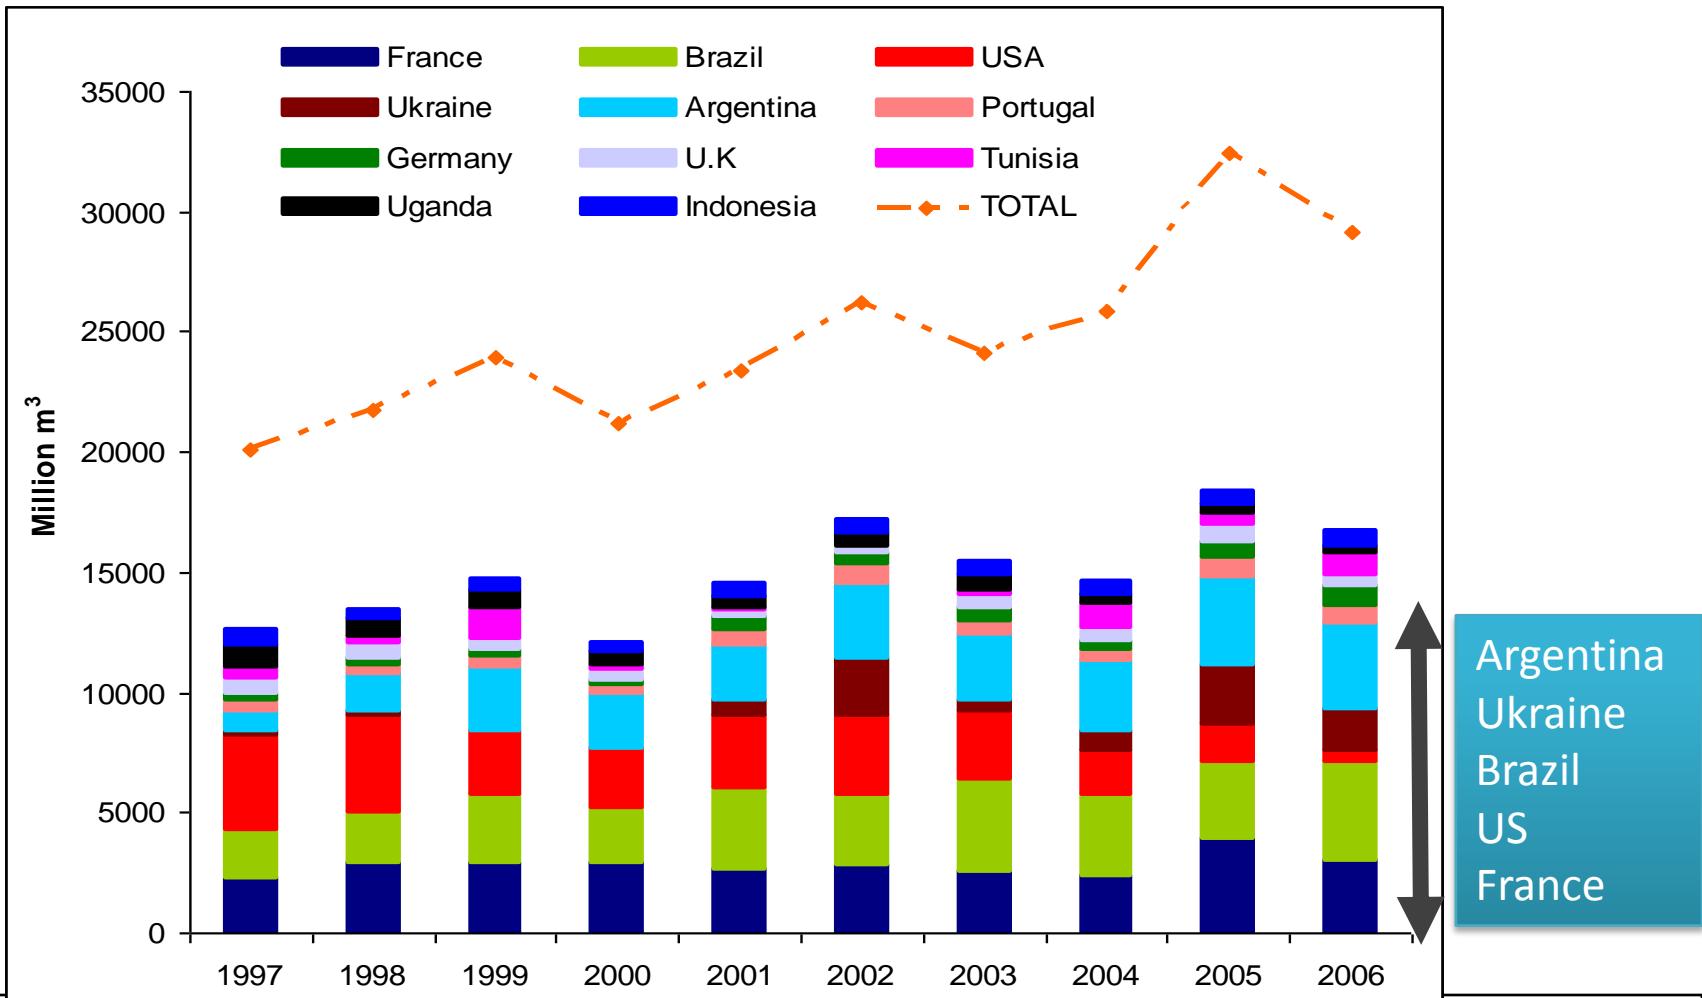

# The case of Spain: Virtual water trade through crops' trade

# The case of Spain: Virtual water trade through crops' trade

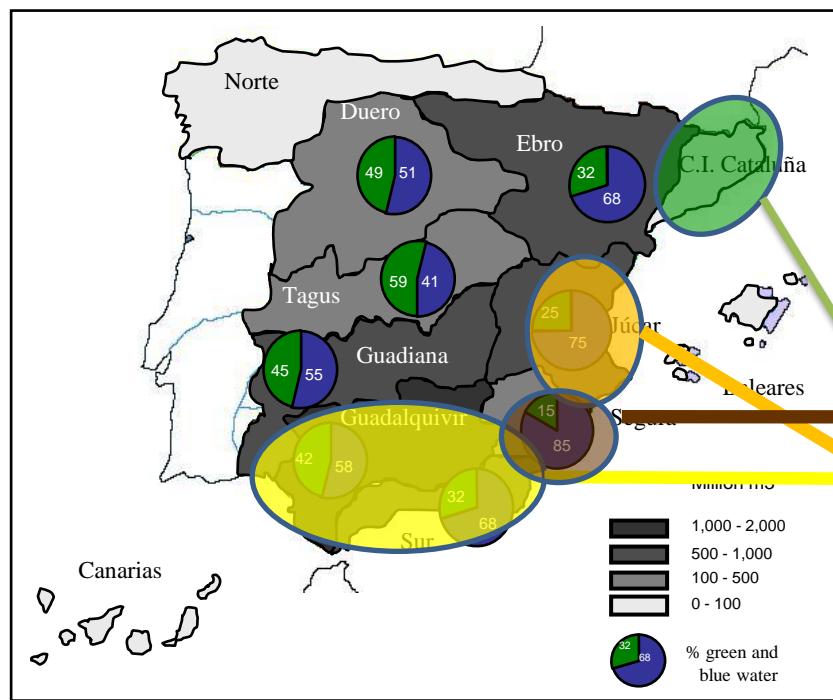

# The case of Spain: Virtual water imports

# The case of Spain: Space dimension

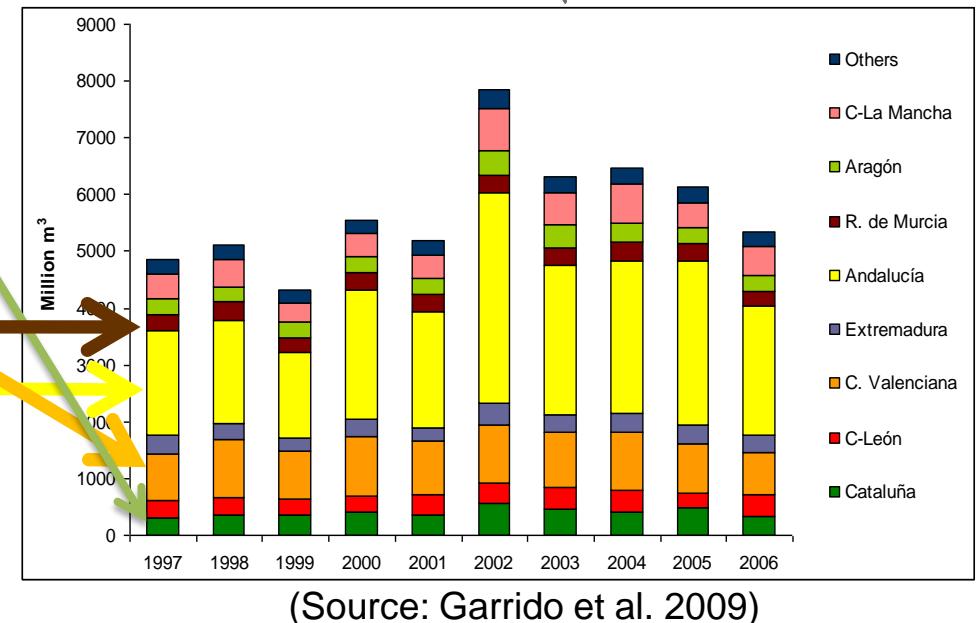

## Blue water exports

### Water stress

(withdrawal-to-availability)

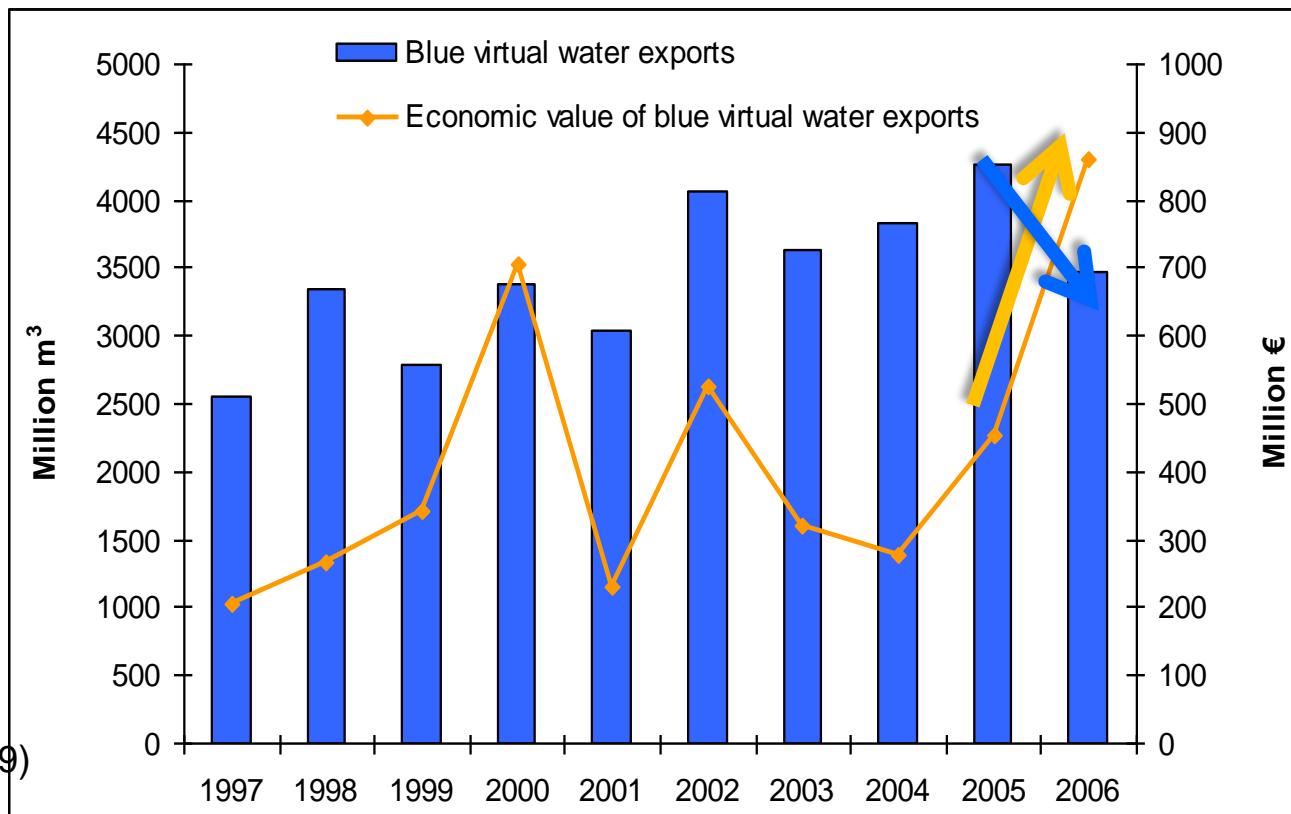

- < 0.3
- 0.3 - 0.4
- 0.4 - 0.5
- 0.5 - 0.6
- 0.6 - 0.7
- 0.7 - 0.8
- 0.8 - 0.9
- 0.9 - 1.0
- > 1.0

# The case of Spain: The economic dimension: the scarcity value of water (€/m<sup>3</sup>)

## Blue water exports

Not all exported m<sup>3</sup> are equally valuable

(Source: Garrido et al. 2009)

# The case of Spain: Does virtual water trade exacerbate water scarcity?

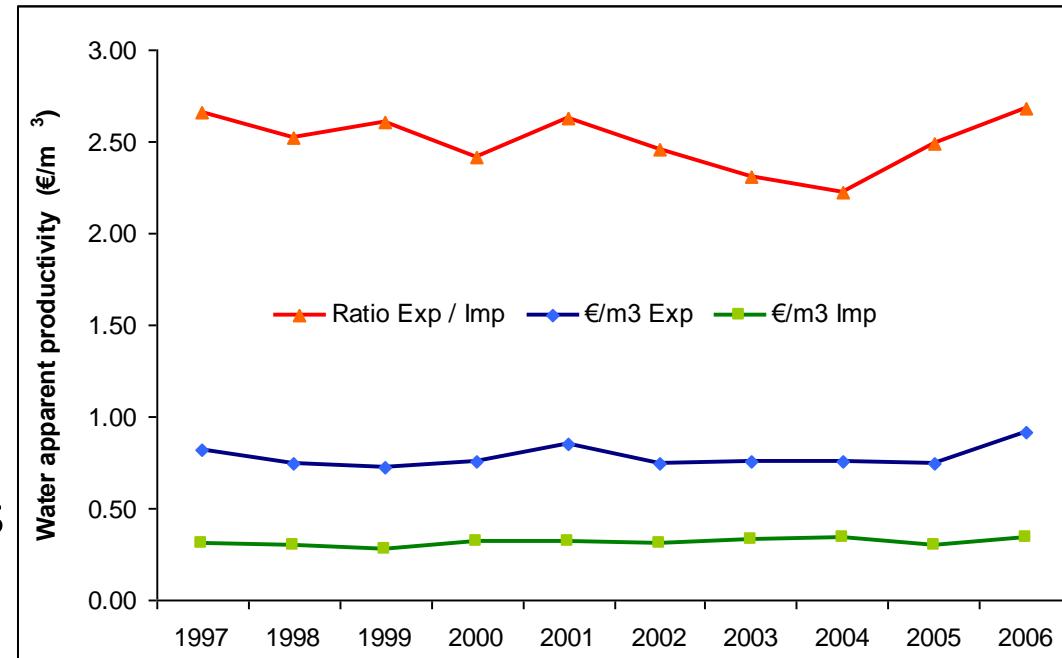

Based on statistical analysis

(41 provinces, 10 years, cross-section, time-series analysis)

- No, it does not exacerbate water scarcity. Virtual water exports are the result of:
  - Natural endowments
  - Access to markets
  - Existence of capital infrastructure
  - Work productivity
  - Water policies

# The case of Spain: Does Spanish water trade contribute efficiently to world water productivity?

- Yes, it converts green water into blue water, and has specialised in:
  - Meat production
  - Fruits and vegetables
- “Water” exchange terms have remained stable (1996-2006)

# THANK YOU
